EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the prior art of record does not show the method and apparatus, *inter alia*, where the heat exchanger fin is formed by boring a through hole in the oval projected section of the metal plate that has been drawn a plurality of times into its oval projected section or where a pierce punch is provided so as to form the oval projected section into the oval collared through hole in a die set having a plurality of oval drawing dies and a plurality of oval drawing punches, respectively. Baba (6,415,506) shows a collared opening can be produced in a plate by drawing the circular projected plate to form an oval projected section with a prescribed height. However, Baba does not show a step of boring a through hole in the oval projected section since the circular projected section has been provided with a hole. Lu (5,366,006) shows in Figures 9 and 10 the formation of a cup shaped projected section 62 by a die 60 having an elliptical shaped end to impart an elliptical, cup shaped depression 62 in the plate. An opening is pierced in the elliptical section to form tabs 56, 58. Lu does not show that the oval projected section is formed by drawing a plurality of times or that a die set is provided so as to form the oval projected by a plurality of oval drawing dies and a plurality of oval drawing punches.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
